Leadership and Advocacy in Social Work and Health Care Professions

2nd Online Workshop for

## Advocacy and Empowerment for Displaced Single Women Head of Household : The Case of Irbid and Mafraq in Jordan

GJU Team

## Accomplishment-1

- Research team attended the “Qualitative Methods in Migration and Health Research”, a training workshop
- for early career researchers, the training covered:

- Which research method to use quantitative

Vs qualitative, When to use each

- Types of qualitative analysis
- Reflexivity and intercultural factor within qualitative research
- Community based participatory research with migrants and refugees
- Challenges and ethical issues in migration research

## Accomplishment-3

tearfund

Love goes beyond

Germany

Team attended the “Family Strengthening Program” Training at Tearfund Germany, which included:

- Facilitation Skills Training
- Parenting Program Training
- Marriage Strengthening Program
- Pre-Marriage Program Training

Key objective: to provide women with psychosocial support to better cope with difficult circumstances & better support people close to them. The training was attended to meet our research expected outcomes & to help in empowering and enabling displaced single head of household women in Jordan.

# Current status

Reviewing and classifying the literature

Organizing a meeting with the Arab Women Organization of Jordan (AWO) to support and facilitate access to data collection process in July

Preparing formal letters to access the data collection

From participants and the key informants

## What is Next

Preparation for the training with King Hussein Center for Research and Information, which will provide:

- Training on gender sensitivity and qualitative research methods
- Writing the literature review
- Aiming to start in writing the in-depth interviews questions

Starting negotiating access to collect the data

Thank you from GJU Research Team
